

WORKSHEET: CONSTRUCTION

HEALTH & SAFETY

Health and Safety in Construction

EL1 Learning Outcome - Compare image A and B.

Recognise by pointing to or by placing a circle around one essential piece of PPE equipment being worn in Image B which is not being worn in image A.

This piece of equipment is necessary to comply with Health and Safety in carpentry and joinery when using a power saw on site.

Image A

Image B

I confirm that this student has recognised one potential Carpentry and Joinery safety hazard.

Teacher/Tutor Signature _____ Date _____

EL2 Learning Outcome - Create simulated Health and Safety risks in your workshop. Place a photograph of your workshop with simulated risks in place in this box. Student will circle two Health and Safety risks identified in the simulated Risk Assessment.

EL3 Learning Outcome - Once you have completed your Risk Assessment task successfully to achieve EL2 use written or oral communication to state two results of non-compliance with Health and Safety Issues.

State one issue of non – compliance with the workshop risk assessment in the box below.	State one issue of non – compliance with the workshop risk assessment in the box below.
What may result in carrying out the activity shown in the box above?	What may result in carrying out the activity shown in the box above?

I confirm that this student has identified and recognised appropriate risks.
