'Inventions – the Wheel' Story

Rewarding Learning

Wheels turn round. They move forwards or backwards. They can help move objects or people from one place to another.

A trolley helps us to move all our shopping around the supermarket without having to carry it.

Cars and buses help us to get from one place to another quickly.

We use pedals to make the wheels on a bike spin around.

A wheelbarrow has one wheel. It helps us move heavy soil from one place to another when we are gardening.

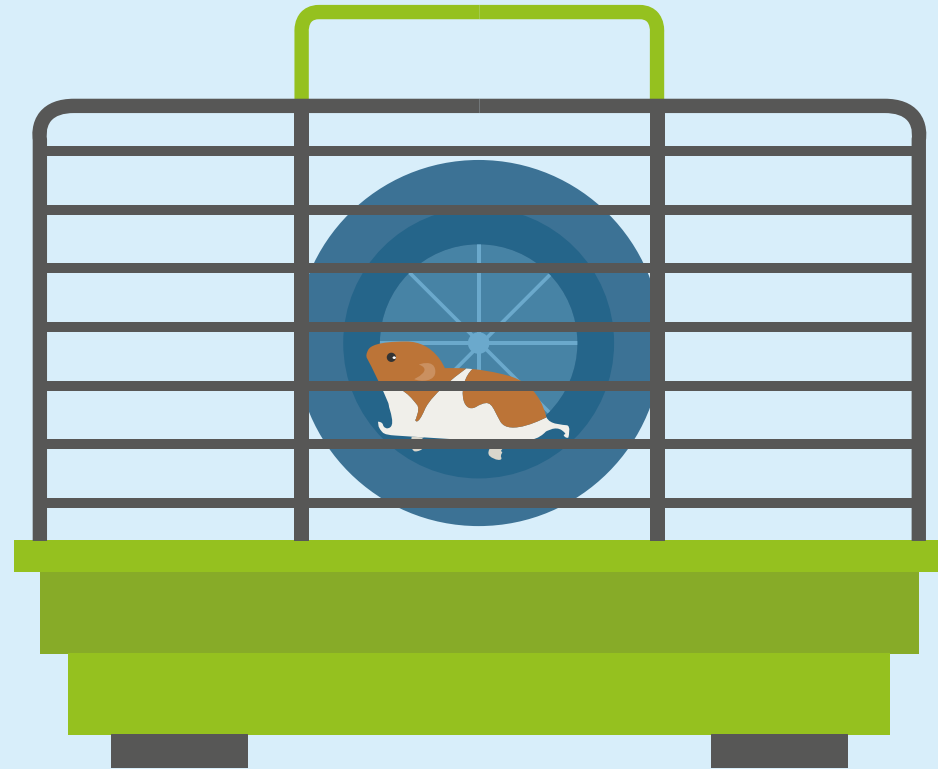

A young child can be pushed in a buggy by an adult. They don't have to be carried.

A wheelchair helps a person to move from place to place.

A wheel allows a hamster to exercise in a very small cage.

All these machines have wheels.
Wheels make our lives easier, they
help us to move and lift things.
