

Buying a Mobile Phone

Problem

Peter wants a mobile phone.

His older brother Sam has offered to sell him his old phone for **£40**.

It will then cost Peter **£8 a month** for a SIM-only deal.

Peter was given money for his birthday from his relatives as follows:

Parents	£15
Grandmother	£10
Uncle Andrew	£5
Brother Sam	£7

Peter's grandmother gives him **£8 every month** for helping her with the gardening.

His parents pay him **£3 every week** for dusting and hoovering his room and keeping it tidy.

He has signed up for an online game membership at **£4 per month** for the next 12 months.

Can Peter afford to buy the phone, and can he afford the SIM-only deal?
