

## Lesson 1 (FE 1.1)

### ROCK HUNT

Location .....

	Name of material	Properties that make it suitable for this purpose	Man made or natural?
Wall			
Roof			
Gutter			
Door			
Window			
Steps			
Door frame			
Window frame			

Go to part of the school building that your teacher has told you to. Look at the building's construction. Try to identify all of the materials used that may have come from rocks. Try to say why you think that material is suitable for building with. Fill-in the last column back in class. Here are some words which may be of help: metal (can you name which type?); glass; concrete; plaster; brick; slate; pliable; strong; flexible; waterproof; transparent . . . can plastic be thought of as coming from rocks?
