

JOURNEYS

Primary Languages

Key Stages: 1/2 Years: 4/5

FOCUS

Children explore why and how we make journeys and what effects they have on the lives of others and ourselves. They explore their journey through life and find out about the similarities and differences that exist within their locality and reflect on the advantages of living in a diverse society. They are invited to experiment by representing this through music and art.

Overview

Knowledge about language

Children will:

- become aware of the centrality of language in communication;
- be able to interpret non-verbal communication, for example facial expression, body language etc tone of voice;
- know that there are many different languages;
- recognise that languages describe familiar things differently;
- know that languages borrow words from other languages;
- know that languages have different ways of expressing social relationships;
- become aware of some of the similarities and differences between the features of English and the target language (TL).

Topic Language Areas

Modes of transport
Directions
Names of countries
Nationalities

Intercultural awareness

Children will:

- become more aware of the country/countries of the TL, the culture and traditions of the speakers of the TL, and compare these with our own;
- know some typical names;
- identify social conventions at home and in other cultures.

The activities suggested in this optional section of the ICL are intended to:

- develop the language learning skills of listening and speaking, reading and writing in the chosen new language;
- encourage children to consider the importance of language and to explore the structure of language and the similarities and differences between English and their new language;
- provide a meaningful context for finding out about and understanding the traditions, values and cultures of other people and the countries they live in.

The activities are suitable for children who are just beginning to learn the new language although teachers may adapt them to suit the needs and enhance the learning of children who already have some language learning experience. Language banks for classroom language, for playing games and core ICL language as well as instructions for all the games can be found in the CCEA Guidance for Primary Languages. The flexible structure of the materials also allows teachers to include and combine languages activities from different ICLs when they support a given theme.

The languages activities also complement and reinforce work done in the different Learning Areas and can provide a meaningful and enjoyable learning experience which will contribute to the development of whole curriculum skills.

As well as using the ICL as a context for language learning, teachers will recognise many opportunities which arise during the school day and in the normal class routine for using the new language in a natural and realistic way. Taking advantage of these opportunities will greatly enhance the children's language learning experience.

Where in the World?

Suggested Learning Intentions

- Be able to take part in a short conversation.
- Be able to recognise some simple familiar words in written form.
- Be able to copy some simple familiar words using a model.
- Know that languages describe familiar things differently.
- Become aware of some of the similarities and differences between the features of first and the new language.
- Become more aware of the country of the new language.

Suggested Activities

Invite pupils to locate the new language country on a world map.

Key Questions

- Is the language spoken in other countries?
- If so, where are they?
- Discuss why the new language is spoken in other places: consider migration and colonisation.
- Is this the same for English? Are there people living in Northern Ireland from other countries?
- Are their children in the class from other countries?
- If so, encourage them to share their language, for example expressions for meeting and greeting, please and thank you.

Compare a world map in English with one in the new language.

Key Questions

- Can the children identify familiar countries and capital cities in the new language?
- Can the children identify similarities and differences with English?
- How are UK countries and capital cities named in the new language?
- Label familiar countries, holiday destinations etc on a blank world wall map in the new language.

Make a collection of magazine photos of well known people of different nationalities, sports personalities, celebrities etc. Teacher introduces each person and adds their nationality, for example: this is Thierry Henri, he is French. This is Marge Simpson, she is American etc. If there are children of other nationalities in the class or school, they can become the 'celebrities'. Children listen carefully to differentiate between feminine and masculine endings and compare with English. Place the 'celebrity' photos on the display map. Using the soft ball, children introduce themselves in the persona of one of the celebrities, giving their name and nationality and paying attention to correct ending. In circle time, children introduce themselves to the next person giving their own name and nationality.

Journeys: Planning

Suggested Learning Intentions

- Become more aware of some aspects of the culture and traditions of the country of the new language.
- Be able to remember and reproduce accurately words and phrases.
- Be able to copy some simple familiar words using a model.

Suggested Activities

Discuss journeys we have made, the journey to school, journey to the shops, journeys to holiday destinations etc. How did we travel? What is our favourite way to travel? Use the internet and or travel brochures to plan a journey to the country of the new language. How will we travel? 'Book' flights, ferries, trains and work out journey times and costs.

Using photos, magazine pictures, toys, power point etc. teacher introduces means of transport and associated phrases, I go by train, on foot etc. Play hunt the thimble with transport toys and stepping stones to practice the new vocabulary. Learn and perform action songs such as The Wheels on the Bus in the new language.

Using traditional or electronic resources, carry out a class survey on how we travel to and from school and present findings in the new language. Where possible, share and compare with partner school. Play 'roll the dice' with transport pictures to make sentences such as I go to school by boat, by rocket. (Encourage the children can be as imaginative as they can!)

Finding Your Way!

Suggested Learning Intentions

- Be able to carry out and give instructions.

Suggested Activities

As part of PE warm up, teacher directs the children to move around the hall giving directions to go straight ahead, go backwards, turn right/left etc in the new language. Children take on the role of leader and direct the class. Play 4 corners using go left, go right, go straight ahead, go back.

In groups plan a route for roamer around the hall or class. Swap programming instructions in the new language with another group and see if they can safely steer Roamer along his journey.

Play a team treasure hunt game. Using cones or other markers design a 'maze' in the hall. Choose a player from each team to be the treasure hunter who goes outside while the treasure is hidden. Teams, starting at different ends of the maze have to direct their player to the hidden treasure. The first player to the treasure wins.
