

Step 1

Familiarise Yourself with the Cards

As a first step, consider using our additional teacher support materials for the Thinking Cards, available online at www.nicurriculum.org.uk. You can work on these activities alone or, ideally, with colleagues.

The teacher support materials can introduce you to the cards, develop your understanding of ways to use them, and increase your confidence in using them with pupils.

Then you can begin to think about how to introduce the cards to your class(es).
