

Lesson 1 (VE 1.3)

EARTH'S PLATES

See if you can name the Earth's plates which 'float' over the mantle and give us the Earth's crust – the bit we live on! One's done for you – the Indo-Australian plate has India and Australia on it. There list is below of the missing ones, and there are letter clues given to help you. You may find an atlas useful. The arrows show the directions that the plates are moving in.
