

## **Widening Horizons: Wade Training**

In Wade Training we aim to deliver the highest quality training to our learners and have built a strong reputation for almost 30 years. We pride ourselves on offering a supportive environment where tutors help and guide young people on the road to their chosen careers.

Our trainees study for vocationally related and, where appropriate, Essential Skills qualifications, and we've found that by blending the Widening Horizons materials into our delivery we've enhanced the provision we offer to them. We also use Widening Horizons materials to reinforce their learning and prepare them for the world of work.

In order to meet the requirements for Progress File, we developed a scheme of work to integrate the Widening Horizons materials into our Induction period, Employability and Business Enterprise classes, as well as embedding them into the trainees' Vocational and Essential Skills lessons. With this programme, completing the Progress File has become more fluid and the trainees have been engaged in the learning process.

By examining our existing delivery and blending it with the Widening Horizons materials, we have strengthened our practices. This has allowed trainees to take ownership of their qualifications and encouraged independent learning, helping them grow in confidence and gain employment.
