

Post recognition monitoring report

OCR (Oxford Cambridge and RSA Examinations) welcomes the opportunity to respond to this report. This is Ofqual's first post-recognition monitoring activity on OCR in respect of the Qualifications and Credit Framework.

OCR is a leading UK awarding body. We offer a wide range of General and Vocational qualifications including GCSEs, AS and A Levels, Diplomas, NVQs, Key Skills and Functional Skills, all of which equip learners with the knowledge and skills they need for the future.

OCR has established systems in place to ensure that all our qualifications and processes meet the needs of learners and centres. OCR's new QCF qualifications benefit from a development programme that integrates them within these proven systems. OCR continues to streamline processes and the introduction of the QCF will inform future developments. With reference to areas of non-compliance and observations reported by Ofqual, OCR is working with the regulator to agree an action plan that addresses the points raised. This work will feed into future developments.

We would like to thank the Ofqual monitoring team for their comments and support throughout the process.
