

## **Response to Ofqual Post-recognition Monitoring Report**

BCS, The Chartered Institute for IT welcomes the opportunity to provide a response to this Ofqual monitoring report. This was the first formal opportunity to discuss our experiences with the Qualifications and Credit Framework (QCF) with the Ofqual team.

The Institute found this monitoring activity to be a very useful exercise in independently reviewing how we work and identifying areas for further improvement. We operate a continuous improvement cycle and will build the findings of this report into this process.

The Institute is delighted with the outcome of this exercise and we are confident that we can address the identified areas for improvement swiftly - work is already underway on certain aspects. The Institute will work closely with Ofqual to agree an action plan to address these points and feed them into future developments.

The Institute will also use the outcome of this monitoring activity as a platform on which to prepare for meeting the new general conditions of recognition once they are put into operation.

We would like to thank the Ofqual team for the manner in which this monitoring activity was conducted and for their support throughout the process.
